

Delivering Beyond Small-Talk

Enabling SMTP Authentication with Outlook Express

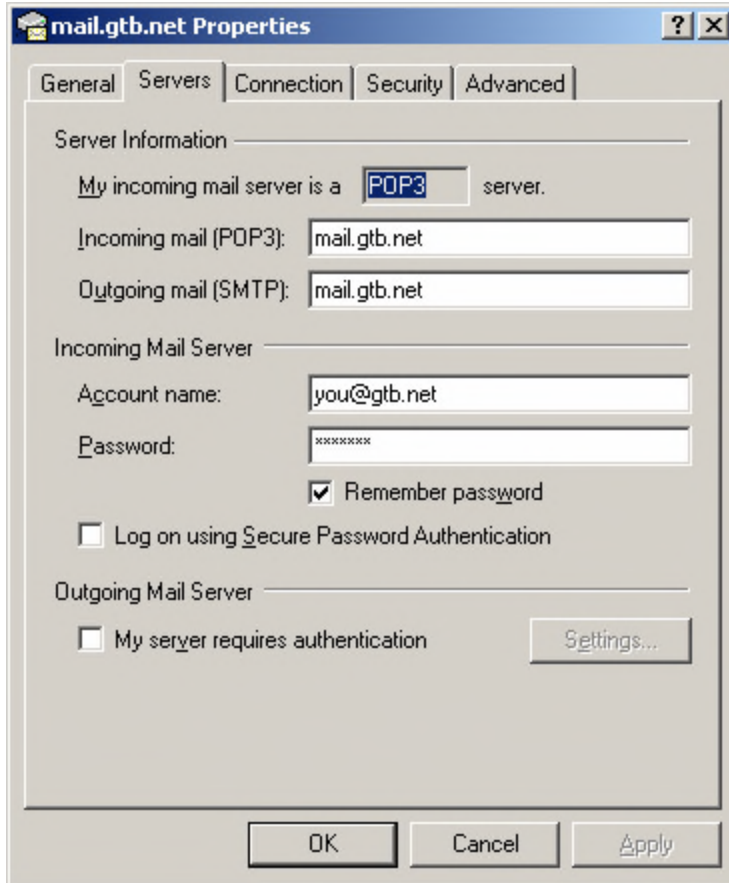

1. Open up Outlook Express
2. Go to the Tools Menu, Accounts

3. You'll want to select "Properties" for your gtb.net (or other domain you have setup through GTB).

Delivering Beyond Small-Talk

4. Go to the "Servers" tab (second from left on the top of the screen)
5. You'll want to check the box that says "My server requires authentication" under "Outgoing Mail Server" and then go to "Settings"

6. Make sure, "Use same settings as my incoming mail server" is checked and hit "Ok"
7. Hit "Apply" on the "Mail Properties" screen and then "Close" on the "Internet Accounts" screen to complete the process.
